A VERY SPECIAL GRADUATION

Graduation will be a very special time this year for Jim Brown. In May he will receive an associate in applied science degree in management and supervision from Shelton and a bachelor of arts degree in business administration from Stillman College.

Brown, who is director of telecommunications for the college, will graduate from both institutions with a 3.92 grade point average.

Many people at Shelton remember Brown as the "man who first put in our new telephone system." He was the person we called everytime we had to program our audix or accidentally punched the wrong button while programming our messages. He installed the AT&T System 75 and worked on it continuously.

When Brown retired from AT&T, he had no idea he would join the college's staff. "I did consulting and contract work for one year," he says. "Then they asked me if I knew anything about microwaves."

From 1959 until 1963 Brown served in the United States Marine Corps. After leaving the service in 1963, he started working for South Central Bell in Tuscaloosa until 1984 when he became systems technician for AT&T in Tuscaloosa.

"After 29 years, I retired; and this gave me the opportunity to go back to college. I took most of my classes at Shelton and finished with the Stillman Management Institute," he says.

Over the past several years, Brown has been named to Who's Who Among Students in American Junior Colleges and was named to the President's List in 1993 and 1994 at Shelton State.
